

M781 – 40mm Training

MAST Technology, Inc., has produced the M781 ammunition for the U.S. Army, Marines, other domestic and other State Department approved customers.

NAME: M781, 40mm LV Practice Round

HAZARD CLASS: 1.4C UN0012 or 1.4G UN0362 (Commercial)

DODIC: B519

PART NUMBER: 932240

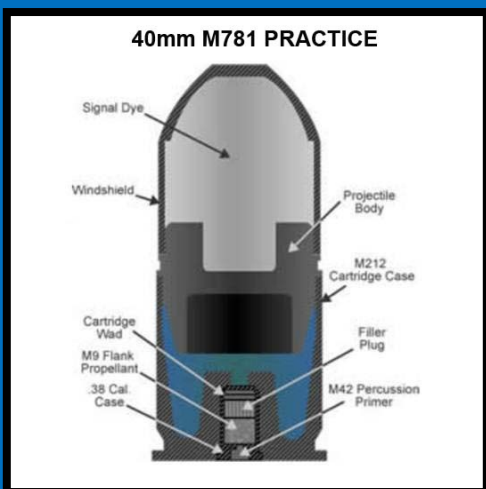

SYSTEMS: Compatible with M203, M320, M79, Milkor MGL and more.

PERFORMANCE: 247 +/- 7 fps (75.3mps) with standard deviation under 4.5 fps. Signal cloud on impact. No fuze.

PACKAGING: 25 rounds per inner box, typically in barrier bag and 100 per wood wirebound crate.

DESCRIPTION: The M781 is a Low velocity training round that is a ballistic match to M433. The round will impact the ground and make a cloud of orange dust to signify impact.

APPLICATION: This 40mm LV training version of the M433 HE/HEDP round displays an orange marking cloud of dust to simulate target impact. It is designed to be a ballistic match to the M433. Also known as 40mm Chalk rounds for the Orange Signal Dye that makes the cloud of dust.
